

Mission 1512 8 June 1959

See <http://arcg.is/1zKG1e> for an interactive web map version.

Flight path notes. Flight was reconstructed using track clock positions and the declassified hand-drawn chart (see no. 1 below). Flight path was corrected for Rolls 7 and 16 via georeferenced vertical frames from the main camera. The flight planned to target the Persian Gulf coast and parts of the interior of Saudi Arabia but this southern extent was aborted for uncertain reasons (see no. 1).

Mode notes. Main camera appears to have always been in 7-position Mode 1, according to the declassified chart (no. 1, see below).

Main Camera notes. Main camera was turned off and back on nine times during the mission before final shutoff near Latakya. These cutoffs are reconstructed from the declassified chart (no. 1) and confirmed in Rolls 7 and 16.

Appears that main camera clock stopped around 7:20 am, near the Persian Gulf. Roll 16 frames are all at 7:25:03 am.
